

AireSpring Cisco Meraki SD-WAN with Integrated Next-Generation Firewall

100% Cloud Managed Security & SD-WAN for a complete connectivity and threat management solution

AireSpring Cisco Meraki SD-WAN with Firewall is an economical solution that provides standard SD-WAN functionality, with an integrated next-generation firewall to ensure your business is protected from external threats. It delivers a fully managed, easy-to-deploy solution, including complete design engineering, dedicated project management and white-glove implementation and support from our team of technology experts. This innovative and customizable package helps companies of any size overcome challenges to success in today's online environment, leveraging SD-WAN features and functionality.

AireSpring Cisco Meraki SD-WAN with Firewall lowers operational costs and improves resource usage and network security for multi-site deployments allowing network administrators to use bandwidth more efficiently, enabling:

- Optimized bandwidth using low-cost public broadband or internet
- Highest level of performance for critical applications
- Industry-leading unified threat management (UTM)
- Consistent application security and data privacy protection
- Improved automation and self-provisioning

Optimize your current communications networks and operational efficiency and reduce IT complexity with Cisco Meraki SD-WAN with fast deployment and managed connectivity options from AireSpring.

AireSpring SD-WAN Benefits

Expand Your Bandwidth

SD-WAN can enhance your internet connection by using low-cost, public broadband or internet connectivity to expand your bandwidth with active/active routing.

Increase Network Security

Experience real-time protection against viruses and malware with the built-in Next-Generation Firewall that filters content, identifies and blocks malware and viruses before they get to your network. Prevent breaches, get deep visibility to detect and stop threats fast, and automate your network and security operations to save time

Reduce Branch Costs

SD-WAN's centralized, cloud-based software reduces the cost of provisioning, maintenance and local network staff, and simplifies branch-office networking.

Simplify WAN Management

SD-WAN offers the ease, flexibility and control of centralized configuration. Gain access to your entire WAN, see network performance and increase network visibility with centralized WAN management.

AireSpring Cisco Meraki SD-WAN with Firewall

Rely on these advantages and key features, with integrated next-generation firewall for full protection.

KEY FEATURES & FUNCTIONALITIES	BENEFITS	AireSpring Cisco Meraki SD-WAN with Firewall
AireSpring White Glove SD-WAN Professional Services	<ul style="list-style-type: none"> Includes implementation design and engineering. We will design (pre-sales), deploy (provisioning) and support (customer service/NOC) your SD-WAN solution at no additional cost. Plus, we provide branch deployment support via pre-configuration of SD-WAN edge boxes. 	✓
Free Network Monitoring 24/7/365	<ul style="list-style-type: none"> 24/7/365 real-time monitoring by the AireSpring Network Operations Center (NOC), using AireNMS. Proactive ticket initiation, management and resolution by AireSpring NOC in the event of a network alert. 	✓
Free 3rd Party Circuit Support	<ul style="list-style-type: none"> AireSpring will proactively open repair tickets on behalf of customers for their non-AireSpring, internet-only circuits. Not offered by many vendors. Only available at a premium cost by the few that do. 	✓
Free Read and Write Access	<ul style="list-style-type: none"> Free Read and Write Access to Cisco-Meraki Dashboard provided (notification required when ordered). 	✓
WAN Failover	<ul style="list-style-type: none"> Every Appliance supports multiple WAN uplinks with seamless, automatic failover for protection against connection outages. Optional HA warm spare failover ensures the integrity of service at the appliance level. In the event an appliance goes offline, a secondary device will automatically take over. 	✓
3G/4G Failover	<ul style="list-style-type: none"> Traffic will be redirected to a 3G/4G interface in the event of a connectivity failure. Requires existing circuit or new 3G/4G circuit (sold separately). 	✓
Advanced Firewall and Unified Threat Management (UTM)	<ul style="list-style-type: none"> Next-Generation Managed Firewall with UTM features such as Intrusion Detection & Prevention, URL Filtering, Anti-virus, Anti-Phishing and Advanced Malware Protection. Comprehensive, multi-layered security that safeguards your network and data assets against viruses, malware and emerging cyber threats. Control outbound and inter-network traffic using firewall rules. 	✓
Maximum WAN Links	<ul style="list-style-type: none"> 2 up links supported. Traffic distribution over multiple pathways (internet, cellular), with built-in load balancing and automatic failover capabilities. 	2
IPsec Virtual Private Networking (VPN)	<ul style="list-style-type: none"> Provides the ability to quickly interconnect locations over inexpensive broadband circuits. 	✓
Traffic Shaping	<ul style="list-style-type: none"> Provides the ability to prioritize network traffic so that heavy-use applications or those requiring a significant amount of bandwidth to operate do not impact other users on the network. 	✓
Per Flow Load Balancing	<ul style="list-style-type: none"> Rule-based per flow load balancing. Packets of the same flow go over the same link. 	✓
